

Technical Chairman's report, 2017-2018

The technical committee has had two meetings together with the board meetings. In addition to this we have had several mail and telephone discussions. The TC members have been, Kay-Enno Brink and Bjarne Marcussen.

In order to resolve a potential conflict in duties regarding manufacturing a new aluminium mast, Bjarne Marcussen step back from his function as technical expert in the TC. After many years of engagement also Kay-Enno Brink has declared his retirement from the function as chief measurer. NFIA thank them both for the great commitment and the good advice during their time in NFIA.

The Board is looking for qualified Folkboat sailors to cover these functions in the future.

To define the approval of a new aluminium mast more clearly The Board have decided that a CR amendment will be presented for approval at the NFIA's AGM in Simrishamn.

All members/Folkboat-sailors should feel free to give their ideas and comments to the TC at any time.
